

AHS has subscribed to an online resource called Noodletools. This is a product that assists in creating bibliographies or works cited pages.

Follow these steps to set up a NoodleTools account for yourself:

- Go to the website www.noodletools.com
- Click on 'Current users Sign In' under NoodleBib on the left.
- Click on 'Create a Personal ID'
- Select the first option, 'An account linked to a school/library subscription or trial'
- Click 'Register'
- Our School/Library Username is apex and the password is cougars
- Once you are in you will need to register and create your personal username and password. I suggest you use your Novell username & password login. Once you are registered, you will use this personal sign in from now throughout your high school career.

Besides using Noodletools for the MLA Works Cited for our Health Research Project...you can use it for any of your other classes. There is also a place for you to make notecards online. This might be very useful for English term papers or graduation project papers.
